

Rest Assured

Rest Assured Offers Peace of Mind Through Technology

Rest Assured offers a full suite of home monitoring services and solutions to help individuals with intellectual and developmental disabilities (IDD) maintain healthy and safe lives. We tailor support service options to each person's unique needs and abilities. Services are specifically designed to help individuals with IDD gain independence.

Smart Home Monitoring & Remote Care

Rest Assured is a real-time monitoring system with two-way communication. Service options include:

- **Active Support:** Continuous real-time oversight and support by Rest Assured remote caregivers.
- **Check-in Support:** Periodic short "check-ins" to give reminders or wellness checks.
- **Emergency Watch:** Passive systems that detect emergencies (smoke, carbon monoxide

and weather) and emergency buttons prompt a response by Rest Assured remote caregivers.

- **Family Support:** Remote access to video and sensor activity for authorized individuals.

Remote caregiving may assist with:

- Medication management
- Seizure and fall detection
- Remote assistance with completing various activities of daily living
- Elopement reduction
- Event alarms requiring emergency response

Our services are available 24 hours a day, seven days a week. Based on an individual's specific needs, our services can be used either as an alternative to in-home care or in conjunction with home care services.

Call us at 877-338-9193, email us at info@restassuredsystem.com or visit our website at restassuredsystem.com to learn more.

Remote Caregiving Services Customized to Each Individual's Abilities & Preferences

Who We Serve

Rest Assured provides services for individuals who want to live independently at home but need some assistance to do so safely and with peace of mind. We serve individuals with intellectual and developmental disabilities, seniors, people who have been injured on the job and individuals with acquired brain injuries. Rest Assured also provides services to many types of agencies across the United States.

How We Help

Our services are available 24 hours a day, seven days a week. Based on an individual's specific needs, our

services can be used either as an alternative to in-home care or in conjunction with home care services.

Rest Assured works directly with individuals served, family members, physicians, providers or other supporting agencies to answer any questions about our services. We will work with you to develop care solutions customized to your unique needs and situation.

Cost Effective Care & Quality Outcomes Through Remote Monitoring & Support

Care Management Solutions

Our caregivers remotely provide personalized interaction based on monitored activities. Smart home monitoring includes a full suite of electronic devices that monitor and alert for a wide variety of conditions and activities.

- A Sleeping Area** – Sensors monitor and alert for incidents during the sleep cycle that may indicate changes in habits or medical condition.
- B Bathroom Area** – Sensors alert in the event of a fall or other changes so help can be summoned with the press of a button.
- C Living Area** – We provide a live remote caregiver monitor for interaction. Area cameras and sensors can monitor activities in real time, including activity around doors and windows.
- D Kitchen Area** – Motion sensors monitor refrigerator and cabinet use, which may signal changes in eating habits or stove use.
- E Whole Home** – Smoke and carbon monoxide detectors alert for emergency situations.

Note: Cameras are not used in bedrooms or bathrooms, unless medically required and approved by resident or legally appointed guardian.
